

The Mokelumne River Watershed

It's your watershed, your future – your voice matters!

Please join us for the fourth public workshop of the MokeWISE program
We will discuss progress made on project concepts and next steps

Date: Thursday April 9, 2015

Location: San Joaquin Farm Bureau

Start Time: 6:30 PM

3290 Ad Art Road, Stockton, CA 95215

Light refreshments provided!

Program Purpose

California is facing what could be the worst drought on record, which may have severe consequences on our water supply. The Mokelumne Watershed Interregional Sustainability Evaluation (MokeWISE) program will develop projects and programs that will increase the sustainability of our region and help mitigate the effects of drought.

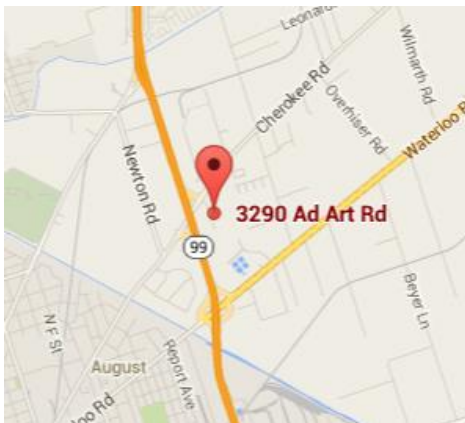

Program Overview

The MokeWISE program will develop and evaluate alternatives to enhance water resources management within the watershed – ranging from the Sierra foothills in Alpine County to the Delta. A variety of water sources will be assessed and evaluated, including stormwater, recycled water, Mokelumne River water, groundwater, desalination, and conservation. The program will result in a broadly-supported water resources program that will help us better prepare for an uncertain future. The MokeWISE program will:

- Evaluate opportunities for integrated and collaborative water management, with the potential to provide benefits to a broad range of Mokelumne River basin stakeholders
- Identify actions with broad support amongst participating stakeholders
- Develop a multi-regional conceptual plan to implement the preferred program

Join Us!

During this fourth workshop, you will learn about the progress made on developing the project concepts being considered in the MokeWISE program and next steps.

From Stockton: Take CA-4E and merge onto CA-99N. Take the Cherokee Road exit and cross over Cherokee Road. 3290 Ad Art will be on the left side of the street.

From Jackson: Take CA-88W and merge onto CA-99N. Take the Cherokee Road exit and cross over Cherokee Road. 3290 Ad Art will be on the left side of the street.

For further directions, call (209) 931-4931
